Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- Cool and wet weather is expected today into Monday as a weather system moves across Northern California. Precipitation will overspread today with showers continuing into Monday. Expect snow levels to lower to pass levels this afternoon and down to 3500-4000 feet by Monday. There is also the potential for thunderstorms on Monday with locally heavy rainfall.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Widespread light rain will push inland through the morning with numerous showers likely along the coast later in the day. Snow levels will fall through late tonight and additional showers with perhaps a few thunderstorms are expected Monday.

Medford Weather:

A cold front will continue to push inland today. Behind the front, expect numerous showers today and tonight as an upper trough moves into the Pacific Northwest coast. By tonight, snow levels of around 4000 feet are expected for much of the forecast area with light showers continuing. With the upper trough in place on Monday as well as a weak surface low along the Oregon coast, expect scattered to numerous showers and low snow levels of around 3500 to 4000 feet. On Tuesday, a weak upper level ridge will nudge into the area with mainly dry conditions expected over the area. However, a front will shift into the area from the northwest Tuesday night and Wednesday bringing additional chances for precipitation.

Reno Weather:

A cold winter storm system will begin moving into the area by late afternoon and linger through late Monday. Showers will start as rain in the lower valleys late tonight but quickly change over to snow by Monday morning. Snow showers could linger into early Tuesday morning, producing travel impacts for the morning and evening commutes Monday, and the morning commute Tuesday. Dry conditions with well below normal temperatures continue Wednesday followed by a slow warming trend later next week.

San Francisco Weather:

A cold front will spread rain from north to south across the region today. Showers will develop behind the front tonight and continue through Monday. There is also a slight chance of thunderstorms late tonight and Monday. This is a cold weather system and snow levels will drop to 4000 feet by Monday morning. Dry weather will return on Tuesday, but cool weather will continue through midweek with patchy late night and early morning frost possible in the valleys Tuesday night and Wednesday night. Dry weather will continue through the end of the week. Another Pacific weather system may bring rain to at least the northern part of the area next weekend.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

A weather system will move across Northern California today into Monday bringing rain, mountain snow showers, and a chance of thunderstorms. Dry and cool weather is forecast midweek.

Hanford Weather:

A weak ridge of high pressure will provide a continuation of dry weather to the central California interior through today. A storm system will bring precipitation to much of the district from tonight through Monday night. A few showers may linger over the Sierra north of Kings Canyon Tuesday as the storm exits into the Great Basin. Seasonable afternoon temperatures can be expected through the weekend before colder air arrives early next week.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A cooling trend will begin today. A fast moving cold front will likely bring some rain to northern areas tonight with a slight chance of rain in southern sections. There will be a chance of showers Monday and Monday night behind the front, and it will be quite cool. Drier weather is expected Tuesday and there will be some gusty winds. A warming trend is expected Wednesday through Saturday as an upper high builds into the region.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

High pressure will weaken inland through today as a low pressure trough approaches from the northwest. A cold front associated with the front will sweep across the area on Monday accompanied by a few light showers. This will be followed by colder, more unstable air that will set off another round of scattered showers Monday night into Tuesday morning. Stronger onshore flow will build the marine layer and produce gusty winds over the mountains and deserts again late Monday and Tuesday. Much cooler temperatures through Tuesday, and then sunny and warmer for the balance of the week as high pressure rebuilds over the Great Basin and dry offshore flow returns.

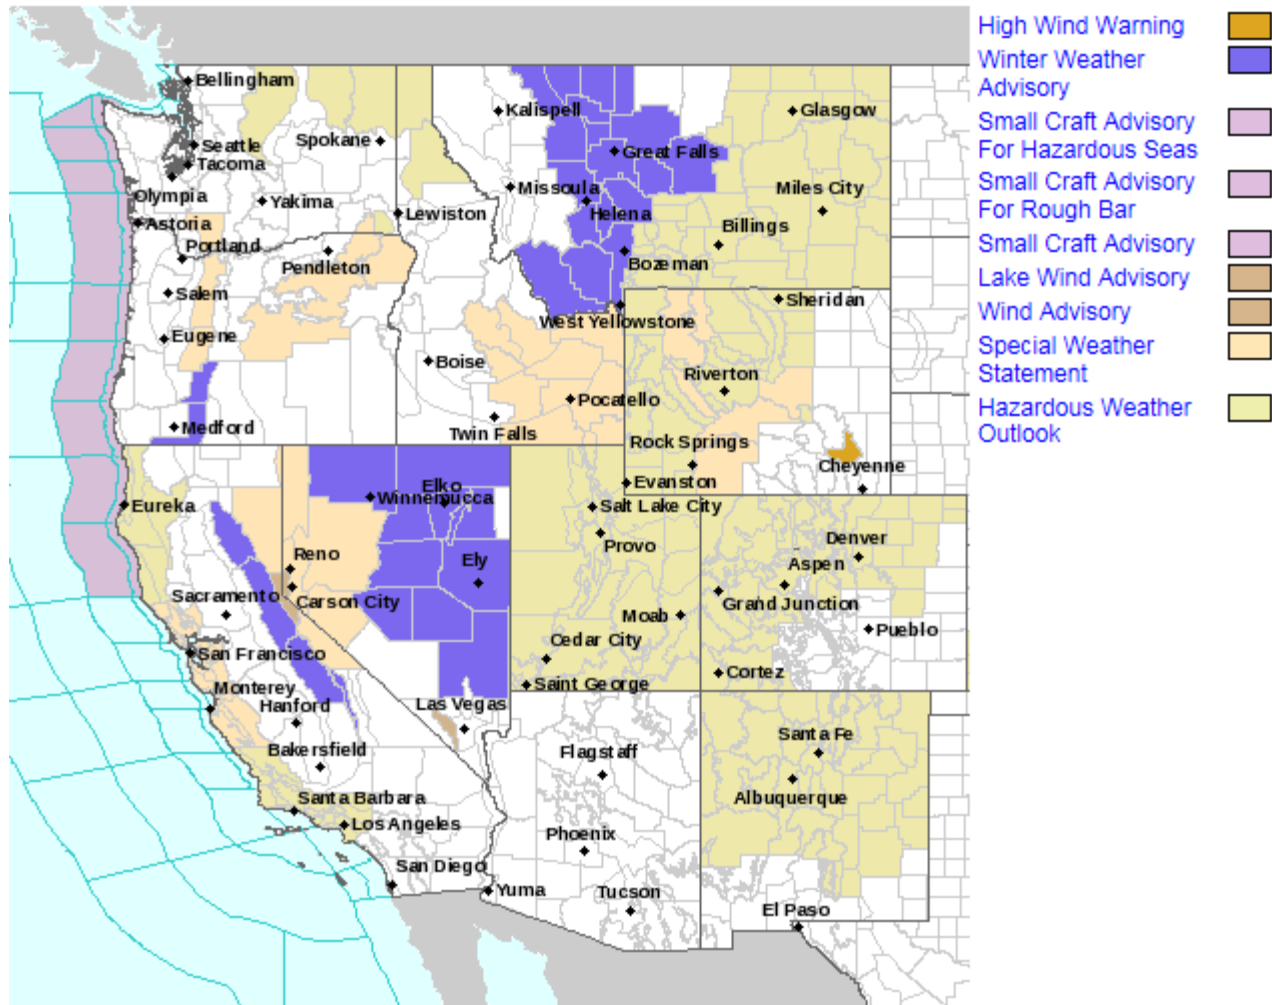

Southeast California Weather:

Near normal temperatures and mostly clear skies will prevail through Monday as weak high pressure shifts slowly across the Desert Southwest. A low pressure system will sweep through the Four Corners on Tuesday bringing increased cloud cover, noticeably cooler temperatures, and locally breezy conditions. A gradual warming trend will begin on Wednesday and continue through the remainder of the week as high pressure builds back across the region.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

Local Emergency Proclamations:

A total of 62 local Emergency Proclamations have been received to date from city, county, and tribal governments, as well as special districts:

- 28 Counties: Butte, Colusa, El Dorado, Fresno, Glenn, Inyo, Humboldt, Kern, Kings, Lake, Madera, Mariposa, Merced, Modoc, Plumas, San Bernardino, San Joaquin, San Luis Obispo, Santa Barbara, Shasta, Siskiyou, Sonoma, Stanislaus, Sutter, Trinity, Tulare, Tuolumne, and Yuba.
- 13 Cities: City of Live Oak (Sutter County), City of Lodi (San Joaquin County), City of Manteca (San Joaquin County), City of Montague (Siskiyou County), City of Porterville (Tulare County), City of Portola (Plumas County), City of Ripon (San Joaquin County), City of San Juan Bautista (San Benito County), City of Santa Barbara (Santa Barbara County), City of Rancho Cucamonga (San Bernardino County) and City of West Sacramento (Yolo County), City of Willits (Mendocino County), and City of Fort Bragg (Mendocino County).
